St. Louis, MO 63141

RE: Forthcoming Public Information and Regulatory Release Decision and Permit
Termination

Dear Mr. House:

The U.S. Environmental Protection Agency (EPA) Region 7 and Missouri Department of Natural Resources have determined that the RCRA Part I and Part II Permits are no longer necessary for the facility property Solutia once owned along First and Second Streets in downtown South St. Louis, Missouri. The EPA and the Department intend to inform the public and offer opportunity for public comment on the proposed permit termination decisions related to said property. Environmental regulatory departments have public information and engagement responsibilities, and you should be aware of forthcoming public information and potential engagement activities that involve the property.

A Public Notice will be published in the St. Louis Post Dispatch to inform the public. The Public Notice will specify the dates of the formal time period for review and comment on the proposed permit terminations. Your role in this process is simply to be situationally aware; responses to possible comments rest with the EPA and the Department. For your information, enclosed with this letter are copies of the projected Fact Sheet and Public Notice.

If you have any questions or concerns, please contact Mr. Bruce Morrison at 913-551-7401
